

Hi-Light F.P.™

High Intensity Visual Inspection for Final Packaged Product

Super bright LEDs illuminate products from various angles to visually enhance levels of any foreign and / or undesired matter.

Super Bright LED Technology

Low energy consumption
Extensive Diode life
5500-6500K white color

High Intensity Light

The Hi-LIGHT F.P. ensures light penetration from various angles to visually enhance undesirable and foreign material in a diverse spectrum of products, from very dark CSDs to natural hazy CSDs and Juices

The Hi-LIGHT F.P. super illuminates glass fragments during Glass Bottle Burst Analyses

Take the guess work out of Methylene Blue test for RG Bottles, specially colored glass.
